Commentary

As of September 2026, the CAL Benefit Fixed Income Unit Trust delivered a year-to-date (YTD) return of **6.27%**, underperforming its benchmark by 89 basis points. The fund's performance can largely be attributed to a portfolio duration that is less than the benchmark. Looking ahead, the Trust will seek to maintain a robust liquidity profile through core allocations to treasury bills and bank securities. To enhance overall yield and mitigate geographic risk, the Trust is strategically increasing its exposure to local corporate debt securities and exploring opportunities within global fixed income markets. The overarching strategy remains focused on return optimisation and broad diversification, ensuring the portfolio is well-positioned to meet unitholders' medium- to long-term goals.
